Summary

A novice programmer interested in back-end, especially web development, and I want to improve in this area and add to my knowledge. I am a fast and deep learner of complex problems and algorithms. Developing a full stack web project in .Netcore entity framework. Completed a Golang project-based boot camp with a perfect score and an advanced python course in quera also with a perfect score.

Experiences

IT Coordinator & Web Developer - 2021 - Now

Daryapala Energy Company, Tehran

- Developing a web app with asp.net core containing different areas like document management system , admin area for controlling users and accessibility , mailroom system , etc...
- Network monitoring and troubleshooting

Skills

- Golang (Echo, Gorm)
- Restful API
- Network knowledge
- Git and GitHub
- Python
- SQL, PostgreSQL
- Graph theory

- Basic Front-End (html, CSS, bootstrap, jQuery, JavaScript)
- Basic Linux
- MVC Architecture
- Algorithms
- Entity framework .netcore

Projects

Dpenergy Web Application

Corporate application and automation system

- An full-stack application with different areas such as document management system , user area , admin area and automation system for controlling work flow of different engineering departments with asp.net core entity framework using MVC architecture .
- completed document management system with user login , different data tables , java script charts and other features.
- developed 20 percent of personnel managing area and admin area for granting access to user for different application parts.

Qpay

Payment gateway provider system

-Added database models and migrations.

-Developed user and transaction services using gorm to communicate with postgress database and do the unit testing for all services functions in whole project.

-Learning how to break tasks into smaller parts and collaborate with a team.

Certifications

Advanced python Task oriented course – quera
Basics of programming and algorithmic thinking – quera
Golang boot camp – quera

Education

Diploma of Mathematical Physics: Farzanegan High School (Sep 2018 - Jun 2021) Grade: 19.47
Bachelor of Computer Engineering: University of Science and Research (since 2021)
